

# Agricon Bighead Mix

For horses grazing exotic pastures, may be used for the prevention and treatment of bighead.

A blend of Protein Meal, Limestone, Dicalcium Phosphate, Salt and Trace Minerals.

Bighead is a condition that horses may develop when grazing improved pastures. It often occurs in Buffel pasture, but may also occur with Kikuyu or Setaria. These grasses are oxalic acid rich which "ties up" the calcium causing the deficiency.

High amounts of phosphorus in the horse's diet will depress calcium and magnesium absorption. Feeds such as bran and pollard are low in calcium or too high in phosphorus in comparison. Such diets that are not balanced with added calcium can also result in Bighead

## 25kg bag

### Suitable for:

Horses and foals

### Recommended Intake:

Lactating Mares 200-250g per day

Foals/Yearlings 60-100g per day

### Directions for use:

To be fed ad lib as required

PER KILO ANALYSIS	
Protein Meal	25.00%
Total Crude Protein	10.92%
Salt	25.00%
Calcium	14.06%
Phosphorus	6.03%
Sulphur	0.84%
Potassium	0.48%
Magnesium	0.18%
Vitamin A	32 000 IU
Zinc	333.25 mg
Copper	200.00 mg
Iodine	13.33 mg
Cobalt	10.00 mg
Selenium	3.00 mg

### Warnings & Other Information:

- First Aid: If poisoning occurs, contact a doctor or Poisons Information Centre
- Safety Instructions: Avoid contact with eyes and skin. Avoid inhaling dust
- This product does not contain restricted animal material.

**Withholding Period:** Nil.
